Our goal is to help you get back to living your life.

What Our Patients Are Saying

A source of pride for Norman Regional Hospital’s Rehabilitation Center is what our patients say about us. We strive to care for each patient as though they are family – by giving each patient the individual time and care they deserve. Our scores reflect this attitude.

- 97 percent of our patients say they would recommend The Rehabilitation Center to others.
- 97 percent of our patients say they were satisfied with the overall quality of their nursing care.
- 90 percent of our patients are satisfied with the overall quality of physician care.

Returning Our Patients Home

- 77 percent of patients who were discharged from The Rehabilitation Center were able to return to an independent living setting.
- The average length of stay for a patient is 14 days.

Our Commitment to Quality

The Rehabilitation Center chooses to participate in a rigorous review of its services every 3 years by a national inpatient rehabilitation review body known as CARF. This accreditation shows an established pattern of excellence, where patients are provided with the highest quality of services available.

The Rehabilitation Center is accredited by CARF for the following programs:

- Inpatient Rehabilitation – Hospital (Adults)
- Inpatient Rehabilitation – Hospital: Stroke Specialty Program (Adults)

Patient Success Stories

Our staff takes great pride in helping patients regain their mobility, independence, and ultimately, the quality of their lives.

- A 47-year-old attorney suffered a brain hemorrhage resulting in left-sided weakness and significant difficulty swallowing and communicating; all devastating to his life and career. By working diligently with our rehab team he was able to return to both home and the work he loved.

- A young adult male was admitted following a catastrophic brain injury, which left him aware and awake but unable to move or communicate due to complete paralysis – called “Locked-In Syndrom”. After extensive rehab treatment, the patient was able to walk off the unit and return home.
