

with John Manfredo, Chief Operating Officer

February 2021

Please enjoy our monthly newsletter provided to keep you informed and up-to-date on our Inspire Health project progression! This newsletter will provide a recap of recent events and highlight upcoming milestones for the HealthPlex, Free-standing Emergency Department Plus, and our Porter Campus revitalization and construction projects.

HealthPlex

- Thank you for the feedback! We have received great questions about the walking path to and from Parking Lot A. We will temporarily use the walking path along the pond to enter the HealthPlex from Parking Lot A during construction.
- **Important to note:** Parking **Lot A**—planned to be completed in late June—will be dedicated Healer parking once all make ready work is completed.
- In response to your feedback, we have prepared the walking path by installing more robust lighting, added a magnetic lock to the cafeteria back entrance, and added security camera surveillance.
- Additionally, you will now see a set of construction trailers on the southeast portion of the HealthPlex campus. These trailers will serve as the construction site administration offices and will be there throughout the entire project.
- Construction containment walls are going up inside the HealthPlex. Containment walls serve several purposes: a containment wall helps keep the sights, and some of the sounds, of construction from patients, visitors, and healers; they also serve to contain debris resulting from the construction; finally, and most importantly, they serve as an infection control solution to contain dust that results from the construction process.

Free-standing Emergency Department Plus (FSED+)

- The architects and Rehab super user team incorporated a thoughtful spatial design with an infusion of energizing colors and light for the gym.
- The natural daylight can help energize our patients for their sessions while in the Rehab gym!
- In a few months we will onboard a transition and activation consultants. Super users will work alongside the consultants to start the important planning work to guarantee we can seamlessly transition into the FSED+ space. Activating the space will require a coordinated plan for occupying the new location and assuring all healers are ready and prepared for our first patient care day.

Rehab and Clinic Check-In

Porter Campus

- The Porter Campus revitalization project will see a new free-standing Behavioral Medicine hospital built in the southeast portion of the 30 acre property.
- The existing Norman Regional Hospital will be partially demolished to make room for the revitalization projects.
- The existing northwest tower and Education Center will be retained. The northwest tower will serve as office space for NRHS healers as well as offer an additional site option for patient care needs.
- The Master Plan lays out the general framework for the entire 30 acres of land. The building, identified in the photo with a red dotted line, is intended to show potential future growth for the site if, and when, needed.

Porter Health Village Master Plan

Looking forward,

John P. Manfreda

Chief Operating Officer
Norman Regional Health System
